LTL Carrier Performance Report

LTL Carrier Performance Report

2023 has started with a bit of an unexpected drop in LTL carrier performance, **dropping 5% in January 2023 from December 2022**. Most of that drop can be attributed to the national carrier group.

The drop is a bit surprising as overall volumes still appear to be muted, so we'll have to keep a close eye on the next few months to find out where we're headed. We had hoped that we were heading for a return to normalcy, but that's not in the cards yet.

Congratulations to R&L Carriers for retaining the top spot among national carriers!

Congratulations to Sutton for capturing the top regional spot this month!

LTL Carrier Performance January 2023

CARRIER	PERFORMANCE	ISSUES	DAMAGE	LATE	LOST	MISSED PU	SHORT
