# LTL Carrier Performance Report

As we change our calendars and move into 2023, Reconex is also changing some of the reporting around carrier performance. This month we are showing the top 5 national and regional performing carriers with a qualification around shipment volume. We don't list every carrier, but all statistics are available on-demand for any carrier or shipper interested in THEIR profile.

Carrier performance from a high level is an excellent gauge for getting a read on the industry itself and its patterns over time. Still, ultimately it's all about your specific experience for your business and your carrier lineup. Hence, we encourage you to view this data within Reconex TMS or reach out to our Client Services team for a deeper dive.

TrueMark - December 2022

# LTL Carrier Performance Past 36 months

# LTL Carrier Performance Report

Overall carrier performance hit 88.0% in December 2022, the highest since May 2020. Lower volumes, variable weather (weather-related issues are NOT failures), and rolling location shutdowns helped boost performance. So far, January is looking lower, but it takes time for all issues to work through the system.

# Top-performing Carriers

## NATIONAL CARRIER 2022

Congratulations to R&L Carriers for being best-performing national carrier in 2022!

## REGIONAL CARRIER 2022

Congratulations to Southeastern Freight for being best-performing regional carrier in 2022!

## DECEMBER 2022

Congratulations to FedEx Freight and Southeastern for being best-performing carriers in December 2022!
